PROFESSIONAL SUMMARY

Results-driven Artificial Intelligence & Machine Learning Engineering student with a strong foundation in full-stack development, mobile applications, and data analytics. Experienced in building end-to-end AI solutions, including a multi-modal AI Therapist utilizing the Gemini API. Proven track record in data preprocessing, predictive modeling, and cross-platform app development using Flutter. Committed to leveraging emerging technologies to solve complex problems and deliver high-impact results.

TECHNICAL SKILLS

Programming Languages : Python, Dart, JavaScript, HTML, CSS, C
Libraries & Frameworks : Flask, Flutter, React, Pandas, Matplotlib, Scikit-learn
Tools & Technologies : Git, GitHub, AWS, VS Code, Google Colab

EXPERIENCE

Python & Data Analytics Intern, Dyashin Technosoft **Jan 2026 — Mar 2026**

- Executed comprehensive data processing and analytical tasks for real-world projects, utilizing Python to derive actionable business insights.
- Applied advanced analytical techniques and statistical modeling to solve complex problems and contributed to the successful execution of industry case studies.
- Collaborated with cross-functional teams to streamline data visualization workflows and enhance reporting accuracy.

Artificial Intelligence Intern, Corizo

- Engineered and evaluated machine learning algorithms for predictive modeling, focusing on accuracy and scalability.
- Designed and implemented data preprocessing pipelines to clean and structure large datasets for optimal model training.
- Contributed to the full development lifecycle of AI models, from data ingestion to performance validation.

PROJECTS

AI Therapist Platform, [Link](#)

- Architected a responsive web application acting as a virtual therapist, utilizing the Google Gemini API for highly contextual and empathetic conversational AI.
- Developed a multi-modal emotion fusion system integrating facial, voice, and text analysis to provide dynamic, real-time assessment of user sentiment.
- Engineered a robust Flask backend to manage secure API interactions and automate the generation of structured clinical reports.

Spotify Song Genre Segmentation, [Link](#)

- Developed a machine learning model to classify Spotify songs into different genres using audio features.
- Performed data preprocessing and exploratory data analysis using Panda
- Technologies Used: Python, Pandas, Scikit-learn, Matplotlib.

Cardiovascular Disease Prediction, [Link](#)

- Trained and validated a machine learning model to predict cardiovascular disease risk with high precision based on diverse patient health parameters.
- Performed in-depth exploratory data analysis (EDA) using Pandas to identify key health correlations and visualized findings through interactive charts in Matplotlib.

EDUCATION

Institute of Engineering and Technology, Srinivas University, Mangaluru , Karnataka -

Aug 2022 — May 2026

B.Tech, Artificial Intelligence and Machine Learning - (GPA: 7.77/10)

Developed practical skills in Python, Pandas, Scikit-learn, TensorFlow, and Data Visualization.

Graduated with a CGPA 7.77/10

Specialized in Artificial Intelligence and Machine Learning

AKSGHSS Malappattam, Kannur, Kerala - Higher Secondary Education - (GPA: 80.4%)

Jun 2019 — Mar 2021

Completed Higher Secondary Education with 80.4% marks

CERTIFICATIONS

Python & Data Analytics Internship Certificate, Dyashin Technosoft

AWS Academy Cloud Foundations, Amazon Web Services

IBM Deep Learning with TensorFlow, IBM

IT Specialist Databases, Certiport

Data Science and Machine Learning Internship Certificate, YBI Foundation

Internship Training Certificate, Corizo
